

WHAT I OFFER:

1. CLOUD SOLUTIONS:

Transform your cloud infrastructure with scalable, secure, and cost-effective solutions:

AWS Expertise:

- Compute: EC2 with reserved instances to lower costs.
- Databases: RDS and Elastic Cache for seamless data management.
- Networking & Security: VPC, Route53, WAF, Elastic Load Balancer, IAM for access control.
- Monitoring: CloudWatch, CloudTrail for visibility and compliance.
- Automation: Auto Scaling to handle traffic spikes efficiently.
- Email Services: SES for high-volume, reliable email delivery.

 Whether you need a single service or an entire AWS ecosystem, I've got you covered!

CLICK THIS PRESENTATION TO GET MORE INFORMATION

2. SYSTEM SERVICES:

Keep your systems running smoothly with expert configuration and management of:

- Protocols: DHCP, DNS, HTTP/S, FTP, SFTP, SSH, SCP, and Telnet.
- Web Servers: Traefik, Nginx, PHP setups, and Let's Encrypt SSL for secure websites.
- Databases & Caching: MySQL, Redis, Elasticsearch, and Varnish for optimal performance.
- Security & Utilities: Fail2ban for intrusion protection, rsync for file sync, and logrotate for log management.

 Looking for reliable system setups? Let's create an environment you can count on.

3. RELIABLE BACKUP SOLUTIONS:

Your data is critical ensure it's protected with robust, automated backups:

- Tools: Duplicati, Kopia for encrypted and scalable backups.
- Integration: Support for cloud and on-premises storage options.

 Never worry about data loss again get a backup strategy tailored to your needs.

4. SERVER CONTROL PANELS:

Simplify server management with top-tier control panel setups:

- Panels: CloudPanel, WHM/cPanel, Webmin, Plesk, ISPmanager, CyberPanel, and more.
- Customization: Configurations suited to your specific requirements.

 Let me help you streamline server operations with the right tools.

5. HYPERVISOR EXPERTISE:

Get the most from virtualization with professional Proxmox setups:

- Proxmox VE and Proxmox Backup Server for efficient virtualization and backups.
- Deployment on AWS, GCP, Azure, DigitalOcean, and more.

 Need a virtualized environment? Let's build it together.

6. CONTAINERIZATION SERVICES:

Optimize application deployment with modern technologies:

- Application Containers: Docker, Podman for agile microservices.
- System Containers: LXC, LXD for secure and lightweight virtualization.

 From container setups to management, I provide end-to-end support.

7. PROFILING & PERFORMANCE OPTIMIZATION:

Ensure your applications run at their best with advanced profiling tools:

- Tools: Tideways, Blackfire for detailed performance insights.

 Maximize efficiency and identify bottlenecks—start optimizing today.

8. SERVER MONITORING & NETWORKING:

Stay ahead of issues with proactive monitoring and secure networking solutions:

- Monitoring: Zabbix, CloudWatch, NetData, Grafana, Prometheus.
- Networking: Cacti, AdGuard, Pi-hole, Observium for secure and efficient networks.

 Keep your systems healthy and your network secure with expert setups.

9. SOURCE CODE MANAGEMENT (SCM):

Streamline your development with modern tools for version control and CI/CD

- GitLab for repository management and CI/CD.
- Jenkins for automated builds and deployments.

 Let's optimize your development workflows and save you time.

READY TO GET STARTED?

No matter the size or complexity of your project, I'm here to provide top-notch solutions tailored to your needs. Let's connect and bring your vision to life!

 Message me now, and let's discuss how I can help you achieve your goals!
